Mythily P
Full Stack Developer

SUMMARY

Goal-oriented full stack developer with a passion for working on a project that solves problems with thoughtful UI design, creating intuitive, dynamic user experiences. I primarily work with the MERN stack technologies, proficient with CSS and JS Frameworks with extensive user psychology .

SELF PROJECTS

Diet Application: Myplate calorie counter

- Diet Track application where only logged-in users have access to the dashboard.
- Implemented this application with a complete authentication system along with account verification via email. Users can create and update their Details on the Userinfo page.
- Users can Track their Diet each day
- Users can know their diet plan & access to handling calorie diet with added or removing food details.
- They can also add their water intake levels for their diet plan.
- Using Search bar various food recipes and their nutrients can be seen.
- **Deployed Link:** [Preview](#)

Ecommerce Application

- Implemented this application with a complete authentication system along with various roles (Admin, Client).
- Application systems follow complete authentication for Login, Registration, Forgot and Reset Password via mail authentication. Users can filter products by using Brand, Product Type, and price.
- Users can add/delete products in Cart & Checkout with Price Details.
- **Deployed Link:** [Preview](#)

Admin Dashboard

- Created Admin Dashboard application which is fully responsive to the user.
- The UI has the data grid which is fully customizable with different axis levels where only admin can customize the parts of rows & columns (adding or filtering or removing).
- Users can fill the profile form and can join in the employee list.
- Users can create / remove the specific events in the calendar, and can check the week and day events listed before.
- The users can see the different charts that show their overall performance.
- **Deployed Link:** [Preview](#)

Netflix Clone

- Created netflix application where the users signin and signup.
- Users can search movies based on the category or movie name.
- Users can save a movie only if they login.
- Movies are categorized based on Top rated, Upcoming, Popular, Trending & Streaming to have an easy user experience.
- Users can give a like to their favourite movie.
- **Deployed Link:** [Preview](#)

Food App

- Created food app with the complete authentication system in client
- Foods are categorized from lowest to the highest priced.
- Users can see the various types of food available.
- Users can search for dishes based on the cuisines or dish names.
- Users can find the Top rated dishes in this application.
- Filter type and filter price options are given to have an easy customer experience.
- **Deployed Link:** [Preview](#)
